

## TIE DOWNS SAFELY SECURE EQUIPMENT

Strong hardware can be an easy way to secure equipment. Without a lot of tools, Accon Marine's 195 and 196 Large and Small Tie Downs keep poling platforms, scuba gear, fenders and other marine accessories in place when aboard and underway.

The 195 Tie Down measures 8.9 cm L x 8.9 cm W x 3.2 cm D and the 196 is 5.1 cm L x 5.1 cm W x 2.5 cm D. Both models can be used anywhere gear needs to be fastened to the deck. The large version is great for docks, while the small one is best for personal watercraft.

Constructed of cast stainless steel, both the 195 and 196 deliver long-lasting performance. Each assembly consists of a main body and sealing cup.

To install, users simply drill a 6.4 cm hole for the large version or a 3.8 cm opening for the small model. Both are fastened with four screws.
