

## HIDDEN CLEAT READY AT TOUCH OF A BUTTON

Sailors, fishermen and those who go boating shoeless know the hazards of traditional cleats: they catch sheets, lines and toes. The solution is Accon Marine's original Pop-Up Cleat #202. Flush to the deck when not in use, it's instantly available with the touch of a button.

Built of polished marine-grade 316 stainless steel, the innovative Pop-Up Cleat is sleek and attractive. Pushed into the down position, it locks in place level with the deck and doesn't detract from the flowing sheer of the boat.

When needed, a button on the faceplate releases the spring-loaded cleat. The high-quality Pop-Up Cleat then provides all the strength of a traditional unit and the room needed to accommodate sufficient turns of line.

Each Accon Marine Pop-Up Cleat comes with a backing plate. A top-mount plate is available for installations where there's no access below the deck. Waterproofing drain cups are popular options. They prevent unwanted runoff below deck.

Installation is easy using common tools. A demonstration video of both bottom- and top-mounting the cleat is at [bit.ly/1sN3Yio](http://bit.ly/1sN3Yio).

Accon Marine Pop-Up Cleats come with a lifetime warranty, and are available in 114mm, 152mm, 203mm and 254mm sizes to fit almost any boat.
