

## UNIQUE CLEAT DOUBLES AS ROD HOLDER

Hardware that can serve more than one purpose both frees up space onboard and gains extra value in the eyes of boat owners. Accon Marine's clever Cleat/Rod Holder Combo ensures there's always an extra spot to place a fishing rod, while keeping the cleat out of the way when not needed.

The 152mm pull-up cleat on this combination unit features a stylish yet functional design that rests flush with the deck when not in use. Its integrated rod holder comes in a choice of 0°, 15° or 30° retention angles. Boat owners no longer have to settle for installing a rod holder in a less than optimal location, nor worry about snagging a fishing line while working the day's catch.

The Accon Marine Cleat/Rod Holder Combo measures just 192mm L x 95mm W x 213mm D. It mounts with four 1/4" stainless steel screws.
