

POP-UP STAINLESS BOW LIGHT MELTS STYLE AND FUNCTION

While running lights are required onboard, their knobby appearance can detract from a vessel's flowing lines. The 204 Pop-Up® Combination Bow Light from Accon Marine retracts flush into the deck when not in use, preserving a boat's clean look while protecting the lamp itself from harm.

This stylish light combines port and starboard lamps for bow mounting, available in either standard screw-mount or stud-mount styles. Its 316 marine grade stainless steel construction ensures a long service life. A #78 bulb provides USCG-approved visibility of 1 nautical mile, and is readily available for easy replacement when needed.

The Accon Marine Pop-Up series also includes port, starboard and side lights. All are NMMA type-accepted and Colregs 72-compliant. Each is supplied with a cut-out template for easy installation, while optional drain cups are also available. A helpful YouTube video at bit.ly/2e4F0DE demonstrates the simple process.
