

## ACCON FENDER HANGERS SAVE TIME AND EFFORT

Boat owners know all too well the tedium of adjusting and tying off fenders every time they dock. Clever hardware from Accon Marine offers a quick release means of deploying and retrieving, saving time and effort.

Made from durable 316 stainless steel for corrosion resistance and long life, Accon Marine Quick Release Fender Hangers utilize a small steel anchor that attaches permanently to the fender lines. Deploying is as simple as snapping the steel anchor into the corresponding low-profile base mounted on the boat hull and lowering the fender over the side. To remove the fender, users simply lift it aboard and slide a compact tab on the base to release the line. The quick release design eliminates repetitive tying and untying while ensuring fenders are always deployed at the correct height. An installation video is at [youtu.be/SJIrG8EMALs](http://youtu.be/SJIrG8EMALs).

Accon Marine Quick Release Fender Hangers come in 12.7mm and 25.4mm sizes to accommodate lines of different diameters. They fasten to the boat deck with only two screws.
