A BOAT HOOK BUILT TO LAST

It's an all too-common scenario: someone reaches overboard to tend a line, and their boat hook slips from their grasp, quickly sinking out of sight. Hook-Mate premium boat hooks from Beckson Marine are fully sealed and float in the water, eliminating this familiar problem.

Hook-Mate boat hooks are crafted from a one-piece aluminum core, fully sheathed in PVC to be non-conductive. This important safety factor guards against accidental shocks, should a boater snag an electric wire while probing unfamiliar docks. Further, this construction eliminates corrosion and facilitates easy cleaning for a lifetime of service. It also helps to keep the boat hook cool to the touch on a sun-swept deck.

Built to fixed lengths, Beckson Hook-Mate boat hooks will not bend, collapse or pull apart in use, as can happen with jointed or telescopic models. The one-piece construction is immediately ready to use in any situation, with no fumbling or adjusting.

Beckson's widely-copied, double ball hook end permits pushing, pulling, and line retrieval without slippage. The hook and the hand grip are aligned, which helps keep this tool properly orientated when extended underwater or used in the dark.

Available in sizes from 3' to 8' with a choice of red or blue handles and hooks, Beckson Hook-Mate boat hooks are guaranteed for 5 years. List prices range from \$29.80 to \$63.80.
