A LOVE SEAT, RIGHT THERE WHERE THE DOCK BOX USED TO BE

Dock boxes are incredibly useful for storage, but not too comfortable to sit on. The Waterside Lounger from Better Way Products is different. It holds an astounding 14 cu. ft., and provides a comfortable spot for two to sit, relax and enjoy being by the water.

Unlike plastic boxes, the Waterside Lounger is built with the same heavy-duty fiberglass sandwich core construction that boats are, and has the same glossy smooth, UV-resistant gelcoat finish. Industrial quality gas lifts, and stainless steel full-length piano hinge, latches and cable stay attest to it being built for year-round exposure to the elements.

For maximum comfort, the Waterside Lounger is molded with a slightly angled and divided backrest. Better Way Products' unique EZ Drain system ensures water won't collect and offer an annoying surprise.

The Waterside Lounger is ideal for use on docks and decks, and poolside. Externally, it measures 66" L x 24" D x 38" H and 62" L x 20" D x 20" H, internally. Available in white, grey and tan, it costs \$1,019.

Better Way Products is one of the oldest and largest fiberglass manufacturers in the US. It produces over 30 different unique dock boxes to fit any need and complement any marine décor.
