## SIROCCO II FAN PROVIDES RELIEF FROM THE HEAT

When it's hot and humid, a slight breeze can mean the difference between being comfortably refreshed and miserable, especially when trying to fall asleep. The premium Sirocco II™ cabin fan from SEEKR by Caframo provides the relief needed for total relaxation, whether on a boat or in an RV or vehicle. It offers a wide range of highly innovative features such as 360° airflow, timer presets and automatic voltage-sensing.

Made in Canada, the Sirocco II builds on its predecessor's success as the world's first gimbaled fan. Its unique design provides for 360° directional airflow to create the ideal interior comfort zone and allows it to be folded flat when not in use. It has simple, easy to access controls, including three speeds and four timer settings: three, six, nine and 12 hours.

Ultra-quiet, the Sirocco II has a long-life motor with a minimal power draw that auto-senses between 12V and 24V. On 12V, it uses 0.21, 0.27 and 0.34 amps on low, medium and high speed, respectively. Running on 24V, it draws a mere 0.12, 0.18 and 0.23 amps.

Mounting the Sirocco II is simple. It uses the same easy-to-install baseplate as the original Sirocco for convenient upgrading. Wiring is straightforward and the power supply can run through the back of the plate for hidden installation or out the side if on a bulkhead.
