

DAVIS TOOL WINS MIAMI INNOVATION AWARD

Davis Instruments' Snap Tool Multi-Key won an Innovation Award at the 2017 Progressive Insurance Miami International Boat Show. Vying with 63 products, the National Marine Manufacturers Association and Boating Writers International awarded it top honors in the Boat Care and Maintenance category.

Manufactured from hardened stainless steel, the Snap Tool Multi-Key boasts 16 tools, including a zipper pull, and a tool that grips, snaps and releases canvas button snaps. Recently, Fisheries Supply named it the 2016 Grand Prize Winner in its annual InNEWvation awards announced at the Pacific Marine Expo show.

"Our engineers put a lot of thought into this durable palm-sized toolbox," said Niels Kisling, Davis Instruments spokesman. "Consumer response has been very enthusiastic and sales are taking off."
