BOAT LIFT MOUNTS TO A WALL OR SINGLE PILE, RAISES 3,000 LBS.

Golden Boat Lifts' 3K Single Track Lift is the ultimate in adaptability when space is at a premium. It boasts a small footprint when installed on a seawall and even mounts securely onto a single pile. Despite its size, it confidently raises PWC, runabouts, center consoles and RIBS up to 3,000 lbs. and accommodates up to a 7' beam.

The key to Golden's 3K Single Track Lift's strength is its construction and commercial grade materials. It's manufactured using an exclusive double I-beam track that provides extreme stability for safety and long life.

Power comes from the Golden Sea-Drive delivering 8,000 in. lb. of torque. It's so reliable, it's backed by a 10-year warranty. Yet in 18,000 units manufactured, not a single one has ever failed.

A heavy duty cradle provides superior load distribution fore and aft, and side to side. The pipe structure fits angles from 90° to 45° for maximum hull support. The standard wood or optional aluminum bunks nestle the boat in the exact perfect location. Heavy-duty rollers, a boxed track cover and adjustable guide poles make using Golden's 3K Single Track Lift a breeze.

Golden Boat Lifts' 3K Single Track Lift is virtually maintenance-free. An occasional greasing of easily accessed fittings and check of the cables is all it takes.

For 35 years, Golden Boat Lifts has manufactured a wide range of safe and reliable boat lifts in its ISO 9001:2008 certified facility.

Continually innovating, the company recently broadened its scope with the freestanding Tornado Boat Lift. It offers a wide range of solutions for vessels up to 250,000 lbs. and has a robust dealer network.
