GOLDEN BOAT LIFTS ELEVATES ITS ISO RATING TO 9001:2015

Golden Boat Lifts, the global market leader in aluminum boat lifts, has once again passed its ISO annual audit. The company recertified to ISO 9001:2015 standards. Since 2013, it had held 9001:2008 credentials.

The 2015 ISO standards were developed to address a need for a QMS (quality management system) that reflects the future of manufacturing. Its scope did not change from ISO 2008, but its structure and core terms integrate more easily internationally, and places a new focus on risk management and customer satisfaction. DQS Inc., a well-known and respected registrar, conducted the analysis and audit.

"We're pleased to earn this newest certification to ISO 9001:2015 standards," said Bill Golden, president and CEO. "It's a demanding process that demonstrates our commitment to continuous improvement, the active involvement of both management and employees in a process-based approach and total customer satisfaction." Golden Boat Lifts is the only aluminum frame boat lift manufacturer to hold ISO 9001:2015 accreditation.
