2NM ANCHOR POLE LAMPS DELIVER UNMATCHED PERFORMANCE

Delivering superior efficiency, durability and reliability, Hella marine introduces its NaviLED 360 2NM Anchor Pole Mount Lamps. They are fully certified to provide brilliant LED illumination to a range of 2 nautical miles, available in fixed and fold-down models to meet users' mounting requirements.

The NaviLED 360 Anchor Pole Mount Lampseries is completely shock- and vibration-proof thanks to its no-filament design. Advanced Multivolt™ circuitry draws less than 1W of power, yet operates from 9-33V DC with full reverse polarity, spike and over-voltage protection for reliable operation and long life.

Constructed with only the highest quality materials, the Hella marine NaviLED 360 series is built to withstand the harsh marine environment. Each housing is completely sealed with an IP67 rating. Hella marine uses an impact-resistant Grilamid lens and ultra-resilient acrylics that are UV-, impact- and chemical-resistant. The maintenance-free lamps won't fade, yellow, become brittle or corrode. They meet all international approvals, including the requirements of COLREG, USCG, ABYC A-16, Wheelmark, RCD, Maritime NZ, CE and RCM.

NaviLED 360 Anchor Pole Mount Lamps are available with black or white bases. Fixed pole models are 6" and 8" H, with two counter-sunk mounting holes in the base. Fold-down versions, which swing 180° then

secure into position with a locking collar, come in 12", 24" or 40" lengths. They include a removable wedge to accommodate different surface cambers. These new pole mount models complement the company's proven surface mount 2NM LED Anchor Lamp.

Hella marine products are designed and manufactured in New Zealand. Supported with a full 5-year warranty, NaviLED 360 2NM Anchor Lamps are competitively priced, ranging from \$97 for the surface mount model to \$185 for the 40" fold-down version.
