COMPACT, SEALED LED LAMPS PRODUCE BRIGHT LIGHT

A reliable and low-maintenance source of light, one that's rugged and doesn't need replacement incandescent or fluorescent bulbs, is a welcome addition to any boat. Hella marine's DuraLED 12 Lamp brightens interior and exterior areas with powerful, non-glaring light, and boasts exceptionally low wattage and incredibly durable LED technology.

UV-resistant, the DuraLED 12 features a 5.5" L x 2.6" W x 1.25" H heavy-duty nylon shroud and enhanced impact-resistant acrylic lens. It's completely sealed to IP67 standard for all-weather conditions and extreme environments. Operating on 12V or 24V, it draws less than 2.5W.

The unique design and curved lens of the DuraLED 12 generate an extremely wide and even light pattern. This makes it ideal for confined areas such as engine rooms and storage lockers. The lamp comes pre-wired with 19.7" of twin core marine cable and weighs only 4 oz. It installs easily onto its robust bush mount.

The DuraLED 12 comes in a 5000K bright or 3000K warm white color temperature, and with a black or white shroud. A convenient switch version with the same color options features a fully sealed on/off button control on the center logo.

Hella marine's DuraLED 12 has CE and ISO 8846 approvals, and comes with a 5-year warranty. It has a suggested retail price of \$100 for the standard version and \$128.89 for the switch model.
