HUBBELL OFFERS REBATES IN TIME FOR SPRING COMMISSIONING

With spring commissioning just around the corner, now's the time to replace old, worn-out shore power equipment that poses a safety hazard. Hubbell Marine is offering a \$50 cash rebate on its 50' 50A standard and LED 125/250V Shore Power Cable Sets, and \$25 off its dual 30A to 50A 125/250V Intelligent Y Adapter.

The promotion is valid on purchases from participating retailers between March 1 and June 30, 2018. Owners visit www.marinerebates.com, click on the Hubbell Marine logo, and fill out and submit the rebate form.

Assembled in the USA, Hubbell Marine products are built to last and are compatible with all UL listed and ABYC-approved configurations, ensuring readily-available mating adapters or replacement fittings world-wide. Highly flexible, the 50A cable set is fully molded with a stainless steel threaded sealing ring and strain relief bull rings. The LED model features lights that confirm correct wiring or warn of problems.

Hubbell's Intelligent Y Adapter is perfect for use in marinas where only 30A power is available. It allows safe use of a 50A onboard system, whether it's a 125/250V or 3-phase 120/208V circuit. Sealed against moisture, it features an LED light that indicates correct functioning.

-more-

Suggested retail prices for the 50' 50A cable set are \$550 for the standard and \$595 for the LED model, and \$399 for the Intelligent Y Adapter.
