HUBBELL ANNOUNCES SPRING LAUNCH REBATES

Safe boaters know that keeping equipment in top working order is the best way to avoid potential problems on the water. Just in time for spring launch, a new rebate from Hubbell Marine allows owners to upgrade shore power cable sets and save money in the process.

Those who purchase a 50' Hubbell 50A, 125/250V cable set between March 1 and June 30, 2019 qualify for a \$50 cash rebate. An additional \$25 rebate on the companion YQ230 Intelligent Y Adapter allows boaters to enjoy enhanced compatibility while saving even more money. Owners simply click on the Hubbell Marine logo at www.marinerebates.com to print the mail-in form for sending in with the original sales receipt and UPC.

Featuring stainless steel sealing rings for solid connections, an exclusive crimp termination for longer life and jute filler for maximum flexibility, Hubbell cable sets are assembled in the USA. Fully molded and UL listed, each features integral bull rings for enhanced strain relief. LED models add a visible confirmation of correct connections and warning of circuit faults. They're available in yellow or white.

The companion Intelligent Y Adapter extends the cable set's versatility by providing safe 50A power at marinas where only 30A receptacles are available. A 50' Hubbell 50A standard cable set retails for \$700 and the LED version is \$775. The YQ230 adapter costs \$475.
