USB DUPLEX RECEPTACLE OFFERS UNMATCHED CONVENIENCE

In our increasingly connected world, people expect to be able to quickly and conveniently recharge their portable devices anywhere. Hubbell Marine's 3.8 Amp USB Charger Duplex Receptacle provides ample power—enough to charge two tablets simultaneously—while keeping its AC outlets free for other use.

Built to last, Hubbell's USB Charger Duplex Receptacle uses durable stainless steel ports rated for a minimum of 10,000 contacts for long life. With both USB ports and AC outlets in a single space-saving configuration, clutter and the need for intermediate adapters are eliminated.

Thanks to its efficient design, the device offers a full 3.8 amps at 5V DC for fast battery charging. When not in use, it automatically enters a sleep mode to minimize power drain. This device and many other Hubbell products are used by Captain Dave Carraro and first-mate Sandro Maniaci aboard *Tuna.com*, featured on the popular National Geographic Channel series "Wicked Tuna."

Compatible with USB 1.1, 2.0 and 3.0 devices, Hubbell's USB Charger Duplex Receptacle comes in white, ivory, light almond, gray, brown and black.
