## HUBBELL MARINE RENEWS CONTRACT WITH ABA

The American Boatbuilders Association (ABA) has again named Hubbell Marine Electrical Products its exclusive supplier of shore power products. The contract is effective June 1, 2019, and is for three years.

The distinction is a reflection of Hubbell's commitment to providing value to ABA members through its quality products and technical support. It was first named exclusive supplier in 1998.

"The ABA is pleased to reach an agreement with Hubbell Marine as an exclusive supplier," said Jay Patton, ABA president. "They're an outstanding partner to the association and our members."

"We're honored to be recognized by the ABA in this manner," said Joe DiMaria, Hubbell's director of marine marketing and sales. "Boatbuilders strive to manufacture safe, quality boats. We're proud they place their trust in our products, especially those who export and work under international compliance standards."

The leading US buying group for independent boat builders, the ABA is a trade association comprised of 21 privately-held boat manufacturing companies. It serves as their united voice to suppliers, governments and industry entities. Its website is [www.ababoats.com](http://www.ababoats.com).
