## FOR METAL, POLISHED PERFECTION IS EASY WITH IOSSO

Brightwork has always been a hallmark of a well-maintained boat, RV, car, truck or motorcycle, but achieving it has always been a laborious task. With Iosso Products' Metal Polish, oxidation, tarnish, surface rust and water spots are easily buffed away. It polishes quickly and easily to a high shine that any owner would be proud of.

Metal Polish is simple to use: rub on with a soft cloth and simply buff off by hand or machine. It adds a protective coating and deep shine that lasts for months. The concentrated formula doesn't contain silicone or carnauba waxes, so a little goes a long way. For companies and individuals working in compliance with California Air Resources Board (CARB) regulations, Iosso manufactures a USDA-certified bio-based version of Metal Polish.

Ideal for stainless steel, chrome, aluminum, brass, bronze and copper, Iosso Metal Polish is useful on a wide range of other materials such as porcelain, Plexiglas, hard plastic and painted surfaces. It'll remove black marks that metal often leaves on ceramic, heat bluing on chromed exhaust tubing, and road tar and oil. It's safe to use on jewelry, silverware, musical instruments and other fine, delicate objects.

A 3 oz. tube of Iosso Products' standard Metal Polish costs \$9; 1 lb. of either the original or bio-based version is \$23; 5 lbs. is \$88.
