LEAKS ARE A THING OF THE PAST WITH IOSSO SEAM SEALER

Whether a modern synthetic textile or simple cotton canvas, most fabrics are only as waterproof as their seams. For boat covers, awnings, rucksacks and other outdoor gear, Iosso Products' Seam Sealer keeps moisture where it belongs: on the outside. It forms an effective, invisible seal against water intrusion, without altering the color or feel of the material.

Seam Sealer prevents leaks on cotton, cotton blend, polyester and synthetic coated fabrics. With the correct seam construction, it's even effective on vinyl coated and vinyl laminate materials.

Most similar products leave behind an unattractive residue. Iosso Seam Sealer provides invisible protection—an important consideration when treating expensive fabrics on both sides of the seam.

Simple to use, Seam Sealer has a sponge applicator tip that's run along both sides of the stitching. Once the thread is thoroughly soaked with the solution, the seam needs to dry for 24 hours before exposing it to weather. After washing or repeated use, a touch-up coating can be reapplied. One 4 oz. bottle covers approximately 50'. Iosso Seam Sealer costs \$8.30.
