## IOSSO BRINGS DEEP LUSTER BACK TO METALS

Even after a thorough washing, metal can look dingy. Metal Polish from Iosso Products cleans, polishes and protects stainless steel, chrome, aluminum, brass, bronze, copper and precious metals.

Metal Polish is simple to use. Rubbed on with a soft cloth, it's buffed-off by hand or with an electric buffer, easily removing oxidation, tarnish, surface rust and water spots. What's left is a deep lustrous shine that protects against future blemishes for months to come.

The advanced formula doesn't contain silicone or waxes. Iosso Metal Polish is highly concentrated, so it lasts a long time. A USDA-certified bio-based version is available that complies with California Air Resources Board (CARB) regulations.

Metal isn't the only surface Metal Polish works on. It's equally effective on hard plastics, ceramics and painted surfaces. It removes black marks from pots and pans, and will even eliminate the discoloration from a chromed exhaust. A 3 oz. tube of Iosso Metal Polish costs \$9; 1 lb. is \$23; and 5 lbs. is \$88.
