## JMP HEADS INTO 2017 CELEBRATING A MILESTONE ANNIVERSARY

JMP Corporation, global leader in sea water pumps and strainers, and efficient, flexible impellers, is celebrating its 40th Anniversary. Since its humble beginnings, the company has grown to become a trusted manufacturer of OEM and aftermarket marine products of the highest quality and reliability.

Expanding into North America was key to JMP's growth. Providing greater product selection with superior quality, the company earned its customers' trust and quickly became the well-known brand it is today.

"We attribute much of our success to embracing the challenge of change in the marketplace," said Chan "CJ" Jeon, JMP Corporation manager. "It made us nimble and has allowed us to continually strive for excellence." A brief video is at [bit.ly/2ijSq19](http://bit.ly/2ijSq19).

ISO 9001 certified, JMP manufactures electro-magnetic clutch, general multi-purpose and engine cooling pumps, sea water strainers and flexible impellers. Its parts and equipment are used by companies such as Kohler, Doosan, Mitsubishi and Hyundai Seasall, as well as private boaters worldwide. The company has distributors in 20 countries across the globe, with eight in North America alone.
