

INFINITY BY HARMAN BT SOUNDBAR SETS NEW STANDARD

Awesome music is as much a part of boating as sunshine. With the new Infinity by Harman® Kappa 4100MSB Amplified Marine Soundbar from Prospec Electronics, crystal clear audio performance—even at 100db—is now available in a super flexible, compact, separable speaker system.

Weather and splash proof, the silver Kappa Marine Soundbar features four 4" long excursion woofers and two 2" edge-driven dome tweeters. It can be separated into two towers to optimize sound quality for specific applications. With two channel, full-range left and right outputs, the device can be expanded with additional components. Matched with its integrated 120W x 2 class-D amplifier, it produces audio that rivals premium home or automotive systems.

Modern and stylish, its quick-release, shockproof mounting system isn't the only adaptable feature about the Kappa Marine Soundbar. It comes with Bluetooth, 3.5mm and RCA inputs, and includes intelligent priority switching that eliminates manual source selection.

Set to Party Mode, three Bluetooth devices can connect to the Kappa Marine Soundbar simultaneously. Perfect for a group of friends on the water, it streams one AVRCP profile at a time while pausing the others. And when it's time to capture the action, there's even a built-in GoPro shoe.

The Kappa Marine Soundbar comes with a detachable RF remote.

-more-

Perfect for a boat, it doesn't need to be aimed at the device and functions even in bright sunshine.

The soundbar features a glowing red LED display that flashes in tempo with the music. A dual-level LED down light adds functionality. A power protection LED alerts to problems such as overcurrent, overvolt, overtemp or DC offset.

Even though the Kappa Marine Soundbar is loaded with cutting-edge features, Harman built in tomorrow's technology. A micro USB connection future-proofs the device with software updates.

The Infinity Kappa 4100MSB Amplified Marine Soundbar measures 31.5" L x 6.1" W x 5" H, weighs 22.7 lbs. and costs \$900. The optional Separation Kit runs \$89.95.
