

PROSPECT ELECTRONICS AWARDED TOP PRODUCT HONOR

Prospect Electronics, market leader in high-performance outdoor audio solutions, was honored with a 2018 *Boating Industry* Top Product award. Its Infinity by Harman INF-BC4 Pre-Amp Bluetooth Controller stood out for its impact on the industry, innovation and how it advances its category.

The all-weather INF-BC4 pairs with any Bluetooth-enabled media device which can be stored safely out of the way. Major functions are directed by the Infinity controller with a rotary encoder and large buttons. It's flush-mounted with no visible hardware, requires only a 1-3/8" hole and quickly connects to an amplifier via RCA cables.

The output of the system is dependent upon the amplifier utilized. The brand doesn't matter, but Prospect offers multiple output solutions with its Millennia, JBL and Infinity labels. The controller's retail price point of \$119.95 makes it appealing to consumers and OEMs alike.

"It's an honor to win a Top Product award," said Josh Berry, Prospect Electronics VP of sales and marketing. "We're very proud of this acknowledgement from *Boating Industry*; it substantiates our role as the leader in the 12V marine audio segment."

For more than 30 years, Prospect Electronics has pioneered outdoor audio innovation, developing products and technologies that transform how

people listen to music while on the water, road, trail or links. It offers a wide range of receivers, amplifiers, speakers, remotes and complete stereo packages.
