

## REVOLUTIONARY MARINE SPEAKER WINS INDUSTRY AWARD

"Revolutionary" is an often overused term, but in the case of the Infinity by Harman RGB Kappa 8" three-way marine speaker from Prospec Electronics, it's completely justifiable. To increase loudspeaker acoustics and installation versatility, it can be installed as one speaker in the traditional sense or separated and installed as a component-style system. This creates a concert-like soundstage in a marine environment and forever alters how people listen to music on a boat. Quickly gaining the attention of OEMs and consumers, the innovative concept stood out from among hundreds of nominations to win a 2019 Top Product honor from *Boating Industry*.

When separated, the higher frequency audio that's produced by the removable 3.5" mid-tweeter is unidirectional. This produces crisp, clear and bright sounds like vocals. Aiming it at ear level separates it from the deep omnidirectional bass produced by the 8" subwoofer installed at leg level. The result is a superior 200W RMS, 500W peak power audio experience without the distortion common with the increased volume needed to overcome boat noise. The Top Product award is presented to products that impact their industry, advance their product category or create something completely new; the Infinity by Harman Kappa three-way speaker checks every box.

-more-

Infinity by Harman's RGB Kappa 8" three-way speaker features RGB lighting in the center mount and a built-in perimeter light ring. Available with white or titanium grilles, its modern design matches any boat décor.

Straightforward for OEMs and DIYers to install, this three-way speaker is 9.5" O.D. and 3.25" deep and uses a 7" cutout. The adapter ring that houses the mid-tweeter needs a 4.5" cutout and is 5.25" O.D. and 2.25" deep. The white (KAPPA8130MAM) and titanium (KAPPA8135MAM) Infinity by Harman Kappa 8" three-way RGB speakers retail for \$399.95/pair.
