## RARITAN SIMPLIFIES TOILET TROUBLESHOOTING

Sanitation systems on modern boats are required to be functional every day. If something ceases to perform as expected, diagnostic data is critical to getting the device back in operation as fast as possible. Raritan Engineering's Bluetooth Flush Control delivers the ability to collect the information to help troubleshoot with customer support and, if needed, send Raritan technicians data necessary to assist in getting a toilet back up and running.

Using Raritan's free Android or IOS mobile app, access to 500 flush records is but a touch away. The Bluetooth Flush Control stores voltage and motor amperage readings for each operation. It provides status of all outputs during the last operation of the device to help troubleshoot quickly.

The Bluetooth Flush Control app is also an easy way to configure the toilet's operation for the optimal balance between flushing efficiency and low water consumption. Owners can choose between two flush cycles, continuous for better rinsing and sequential for efficient flushing. Both offer advanced settings.

Easy to install, the Bluetooth Flush Control works seamlessly with most Raritan electric toilets. With it, there's no need to fish wires through a bulkhead or expensive cabinetry. And because it's wireless up to 50'

away, there won't be any corroded terminal ends and connections. A video is at [bit.ly/RaritanBTFlushControl](http://bit.ly/RaritanBTFlushControl).

Unlike a traditional manual marine toilet that's intimidating to guests, Raritan's Wireless Multifunction Panel and electric toilet is easy to use. Simple graphics explain everything needed to operate the flush sequence.

Raritan products are chosen by powerboat, sailboat, houseboat and megayacht builders and owners the world over for their dependability, environmental responsibility, and simplicity of installation, operation and maintenance. It offers household-style and marine toilets, sanitation devices and systems, icemakers, water heaters and holding tank chemicals.
