CLEANER RENEWS BUFFING PADS IN 15 MINUTES

Boat owners learn early on to keep their tools in top condition, even those used for maintenance. Shurhold Industries' Serious Pad Cleaner is a scientifically formulated powdered cleaner for renewing buffing pads. Completely biodegradable, this product is environmentally friendly.

When mixed with water, Serious Pad Cleaner dissolves and removes compounds and waxes from wool, foam and blended buffing pads. Owners can now reuse their pads, instead of replacing them. The cleaner is also great for microfiber and cotton bonnets and will brighten dock lines.

Pads should be cleaned in the product immediately after use for best results. Owners simply add one scoop of the cleaner to each gallon of warm water. The buffing pads should soak in the mixture for 15 minutes. Extremely soiled pads can soak for longer, up to a week. Users should then agitate the pads, brush them lightly, thoroughly rinse them with clean water and leave them to air dry.

A 12 oz. tub of Shurhold's Serious Pad Cleaner has a price of \$14.98.

Dedicated to educating boat owners, Shurhold provides key tips for boat value preservation at www.shurhold.com. Inventor of the One Handle Does It All system, Shurhold manufactures specialty care items and accessories to clean, polish and detail.
