PFD FOR HANDLES PROTECT, ADDS FLOTATION

Accidentally scratching the gelcoat or paint on a boat while washing it is a thing of the past with Shurhold Industries' new Handle Mate PFD. It protects boat surfaces from scratches, dings and other blemishes that can be caused by aluminum handles. Additionally, it ensures the tool will float if unintentionally dropped in water.

The Handle Mate PFD is a durable black neoprene sleeve that fits securely over the company's 5', 6' and 9' handles. Easily installed, the patented device provides a soft, cushioned grip while protecting from accidental scratches. An included foam insert slides inside the hollow handle for additional flotation. A video is at bit.ly/2fbc9Tz.

The innovative device increases the functionality of Shurhold's One Handle Does It All system. Now landing nets, gaff hooks and any of the company's other handle attachments can be used without fear of losing the handle in the water.

Handle Mate PFD for Shurhold's 5' fixed length handle sells for \$12.98, and \$14.98 and \$17.98 for the 6' and 9' telescoping handle, respectively.

Dedicated to educating boat owners, Shurhold provides key tips for boat value preservation at www.shurhold.com. Inventor of the One Handle
