ELIMINATING WATER SPOTS ON VEHICLES IS FAST AND EASY

No matter how clean a car, truck, motorcycle or ATV is, spots left behind from soap or hard water are unsightly, and make all the hard work washing it for naught. With a few Clean-N-Simple Tips from Shurhold Industries and the right tools, it's fast and easy to get a showroom-like finish.

In many cases, water spots develop from using too much soap or one that's not meant for the application, such as dish detergent. A product developed specifically for vehicles, such as Shurhold's Brite Wash, quickly removes dirt, grease and road grime, without stripping wax. It's biodegradable and won't harm the environment.

It's important to keep all water as clean as possible. That's why Shurhold developed its Bucket Grate. As part of its One Bucket System, the innovative device sits at the bottom of a standard five-gallon bucket. It allows dirt and grime from the washing tool to fall through the baffle and includes two built-in 3 oz. measuring cups for accurate soap proportioning.

Even rinse water can cause spots if it has a high mineral content. The key is to remove it as soon as possible. Shurhold's 12" Flexible Water Blade molds to flat and curved shapes, wiping away water to leave a bone-dry surface. It's so effective, it does the work of a traditional chamois in about one-third the time. A video is at bit.ly/2C2kv1a.

A 32 oz. container of Brite Wash costs \$11.98; the Bucket Grate is \$10.98; and the Flexible Water Blade is \$26.98.

Shurhold is dedicated to educating car and truck owners on vehicle value preservation. Inventor of the One Handle Does It All system, Shurhold manufactures specialty care items and accessories to clean, polish and detail.
