PROFESSIONAL POLISHER DELIVERS BREATHTAKING RESULTS

Shurhold Industries' Pro Rotary Polisher is engineered to deliver rugged, all-day dependability and breathtaking results. It easily cuts through oxidation, and quickly corrects surface scratches and imperfections. In the hands of an experienced coachbuilder or RV service technician, dull and marred paint, metal, glass and composite surfaces will gleam with a renewed shine.

Unlike consumer-oriented orbital-motion machines, the Pro Rotary Polisher features a highly efficient axial rotation. 12 amps and 1,400 watts of power deliver quality results in less time. It's so powerful, care must be taken to keep the tool moving to avoid swirls and blemishes.

Shurhold's Pro Rotary Polisher has three different right- or left-hand ergonomic grip styles for comfortable, extended use. A soft-start power switch avoids the jarring torque associated with competitors' polishers. A locking on button and thumb-controlled variable speed dial make it easy to select from 600–3,200 rpm. A 20' cord provides a great range of project mobility.

The Pro Rotary Polisher features a 7" quick-change backing plate. It makes switching between polishing, waxing and buffing pads fast and easy.

Professional-grade, the Pro Rotary Polisher has EZ Change carbon high-resistance brushes. Large, removable, screened vents deliver massive

air flow to keep the motor cool for a long service life. A video is at bit.ly/2w140Vn.

Shurhold's Pro Rotary Polisher costs \$200. It comes with a canvas storage bag, replacement brushes, tool, detailed instruction manual and one-year limited warranty.

Shurhold is dedicated to educating owners on RV value preservation. Inventor of the One Handle Does It All system, Shurhold manufactures specialty care items and accessories to clean, polish and detail.
