**HAND-HELD DEVICES: SEASUCKER WILL TAKE IT FROM HERE**

Whether aboard a powerboat, sailboat, SUP or kayak, portable electronics are everywhere on the water. But tablets, cell phones, GoPros, MP3 players, fishfinders and GPS units can only be held in the hand for so long. The versatile SeaSucker Naked Flex Mount tames all these accessories. It securely attaches to almost any surface—without drilling—and safely holds small devices at the perfect viewing angle.

Made in the USA, the innovative Naked Flex Mount consists of a pair of powerful 4.5" SeaSucker Vacuum Mounts connected to a sturdy 7" flexible gooseneck arm. Built rugged for a marine environment, the non-marking rubber is UV-stabilized for five years and only 316 stainless steel hardware is used for maximum durability.

Unlike suction cups that need to be crushed into the device to seal and then begin to leak almost immediately, SeaSucker vacuum mounts are superior. Each holds an astounding 120 lbs., even underwater. Pumping the integrated button enables the flexible rubber to grab any clean, non-porous surface—even curved, textured and non-skid gelcoat. An orange power indicator displays when more pumps are needed.

Using the Naked Flex Mount couldn't be easier or faster. One vacuum mount is attached to a device that's wider than 4.5", such as a tablet or GPS. It's universal, so additional brackets or holders aren't needed. Then, the other vacuum mount is attached to the boat.

Removing a SeaSucker vacuum mount simply requires lifting a tab and breaking the seal. It can be then be moved as needed, often out of the sun or rain, in contrast to permanently installed electronic holders. A video is at [bit.ly/2t69YYr](http://bit.ly/2t69YYr).

Back on dry land, its uses are endless. Cars, kitchen, workshop, the back of an airplane seat—there's no limit to where the Naked Flex Mount can be employed. Available in white or black, it comes with a convenient zippered travel case.

Offering a truly modular solution, the Naked Flex Mount converts to a cell phone holder with the Flex-X Phone Adapter. Its frame expands to fit virtually any size device. The GoPro Adapter is perfect for capturing life's adventures. Made from sturdy, black aluminum, it connects to a HERO or VIRB camera. Both adapters easily thread onto the Naked Flex Mount in seconds, after a vacuum mount is removed.

The SeaSucker Naked Flex Mount sells for \$105; Flex-X Phone Adapter, \$35; and GoPro Adapter, \$10.

If there's a surface and something to hold, SeaSucker has a solution. It manufactures a full range of innovative vacuum-mounted boating accessories, including grab handles, cup holders, tables and shelves, rod holders, dry boxes and electronics holders.
