CONVENIENT TOOL & KNIFE HOLDER NOW IN STYLISH ACRYLIC

Having tools and knives scattered about a boat is inefficient and downright dangerous. SeaSucker's Pro Series Tool Holder organizes and secures this gear, and mounts where it's most convenient to the boater—without drilling any holes. In time for the fall boat shows, it's now available in clear acrylic to match any décor, from classic to modern.

Made in the USA, the Pro Series Tool Holder has 17 assorted slots and holes to fit a wide range of implements. Its 11" L x 5" W acrylic or white high-density polyethylene (HDPE) shelf has room for knives, pliers, dehookers, snips, lures and hooks. In the galley, it holds large and small kitchen utensils. When doing a small repair job, it conveniently keeps tools within arm's reach. When it's time for a new project, it's easily moved to where it's needed and stowed when finished.

The adaptability of the Pro Series Tool Holder is due to its powerful 4.5" vacuum mount. It holds an impressive 120 pounds—a far cry from a common suction cup that begins to lose its seal as soon as it's applied. It adheres to any clean, non-porous surface, including textured and curved.

The Pro Series Tool Holder is built for a harsh marine environment. Its components are UV-stabilized and all hardware is stainless steel. The new acrylic Pro Series Tool Holder costs \$125; the HDPE version is \$80.
