GARBAGE IS EVERYWHERE—THANK HEAVEN FOR SEASUCKER

Plastic waste bags are a convenient way for boat and RV owners to contain and dispose of garbage. But they need to be secure to avoid becoming trash themselves. SeaSucker's Waste Band is a simple, removable solution that's mounted on any clean, hard surface. It controls the annoying flapping and spills that are common with bags looped over a piece of hardware or left on a seat. Made in the USA, it comes in small and large to hold a wide range of bag sizes.

The adaptability of the Waste Band is due to its powerful 4.5" Vacuum Mount. It holds an impressive 120 pounds—a far cry from a common suction cup that begins to lose its seal as soon as it's applied.

Waste Bands can be used indoors, but they're built for extreme conditions. The materials are UV-stabilized and all the hardware is stainless steel. They're available in black or white to match any décor.

The Small version has a 6" W x 4" D opening, extends 7.5" from the mounting surface and has two clips to secure the plastic bag. The Large model is 12" W x 7" D, extends 11" and comes with four clips. They cost \$80 and \$135, respectively.
