BOAT OR CAR, CARRYING A SUP HAS NEVER BEEN EASIER

For pleasure or exercise, stand-up paddleboards (SUPs) are a fun and easy way to get out onto the water. But being rather large and heavy, transporting them on a car or boat can be tricky. With SeaSucker's Board Rack and Ozy Mount, it's simple to carry SUPs securely without an expensive, permanent solution. Made in the USA, they install in seconds without tools and, once removed, leave no mark behind.

The secret behind SeaSucker SUP accessories is their innovative 6" Vacuum Mounts. Unlike common suction cups that begin to lose force as soon as they're applied, they powerfully hold an astounding 210 pounds. They're so secure, international cycling teams use them on their chase vehicles during races.

The SeaSucker Board Rack is a pair of padded 31" StarBoard® crossbars with integrated 10" nylon cam-buckle straps. Each has two 6" Vacuum Mounts for a combined holding power of 840 pounds. Engineered to carry two surfboards or SUPs, they install in seconds and remove just as quickly.

The Ozy Mount is a pair of Magma LeveLocks® attached to stainless steel tubes. The SeaSucker 6" Vacuum Mounts attach to the board and the tubes are dropped into rod holders. Notched ends keep them securely in place. Lever-action adjustability allows the perfect transport position.

Like all SeaSucker accessories, the Board Rack and Ozy Mount are built using only premium materials like UV-stabilized rubber and 316 stainless steel hardware. They cost \$399 and \$199, respectively.
