**SCHMITT & ONGARO MAKES REPLACING WIPERS EASY**

Inoperable windshield wipers make it difficult to maintain a proper look-out when heavy rain and driving spray obstruct the view. Schmitt & Ongaro Marine Products offers a line of durable, long-lasting Standard Wiper Motor Kits with everything needed to easily replace faulty equipment.

Ideal for smaller recreational and commercial vessels, Standard Wiper Motor Kits are available with a single-speed waterproof or non-waterproof motor. Built to last, they feature a 304 stainless steel mounting plate, 2.5" shaft and hardware, and a heat-dissipating powder-coated aluminum cover.

The sweep angle can be set to 80° or 110°, and the park position adjusts to right or left. The robust 12V motors will power up to a 14" arm and 14" blade with 5 N·m of torque.

The arms of Standard Wiper Motor Kits are durable black powder-coated stainless steel. The blades are natural rubber for maximum effectiveness and long service life.

Standard Wiper Motor Kits are available with non-waterproof or pre-wired waterproof motors. Both have arms that adjust from 11" to 14" and come with either an 11" or 14" blade. They have a limited 3-year warranty. MSRP starts at \$153.05.
