

## SMARTPLUG OFFERED ON MARLOW-HUNTER BOATS

As the ground-breaking shore power system continues to become accepted worldwide, SmartPlug Systems welcomes another OEM relationship. Marlow-Hunter will now offer SmartPlug products across its fleet of innovative and rugged sailboats.

"Marlow-Hunter is a well-established and respected builder. Their vessels feature incredible craftsmanship and the latest in design," said Ken Smith, SmartPlug founder and CEO. "We're proud to say SmartPlug is among one of the many state-of-the-art options available to Marlow-Hunter customers."

Marlow-Hunter's 40-year heritage of design innovation, rugged construction, and dedication to customer value has made it a leading North American sailboat and sailing yacht manufacturer. Whether a blue water sailor, coastal cruiser, or small-boat energy enthusiast, this boatbuilder can craft a vessel to meet their needs.

The revolutionary SmartPlug system is designed to replace the traditional and problematic twist-type inlets and connectors. Intuitive to use, it provides greater protection against loose connections and corrosion, the leading causes of shore power failure and fires.
