## TRUE HARBOR MOVES INTO NEW FACILITY

To keep up with the demands of a rapidly growing business, True Harbor has relocated to a new, larger facility. This space provides more room for product development and administrative personnel.

"We're excited about this move. We keep moving forward with new products, which requires more space for research and development," said True Harbor president, Dick Cantley.

True Harbor's new business address is 2145 Cole Street, Birmingham, MI 48009. Its phone and fax numbers, as well as email addresses remain unchanged.

True Harbor manufactures unique, non-directional dock panels that are environmentally-friendly. UV-protected and made of engineered resin, these panels can endure extreme temperatures. Due to their self-draining and non-slip surfaces, they are maintenance-free.

Lightweight and easy to install, these resilient dock panels provide superior strength and stiffness. When integrated into a 4-way pattern, they allow L- and T-shaped dock configurations to appear seamless.
