NEW DECK PANELS PROVIDE SIMPLER, FASTER INSTALLATIONS

Representing a new standard in beauty, durability and economy, TrueDeck engineered deck panels from True Harbor save dock and marina owners time and money. Unlike traditional decking products, TrueDeck panels comes in larger, 3' x 4', 4' x 4' and 5' x 4' sizes for easy installation in about 1/4 of the time, greatly reducing labor costs.

Weighing just 1-1/4 lbs. per sq. ft., the innovative TrueDeck requires fewer fasteners and overall panels to complete a dock than competitive brands. Recessed top fastening provides simplified installation and a streamlined appearance. A balanced, 4-way design forms an aesthetically-pleasing, slip-resistant pattern and makes T- and L-shaped docks appear continuous. To complement their surroundings, the unique deck panels are available in Sarasota Sand and Cape Cod Gray

With a limited 12-year warranty, TrueDeck from True Harbor is completely maintenance-free. Manufactured specifically for marine use, the state-of-the-art panels are constructed of UV-resistant engineering resin. Widely employed in outdoor applications, the time-tested material can handle extreme heat, cold and exposure to the sun.

Impervious to chemicals, saltwater, insects and marine borers, True Harbor panels will not support mold or mildew growth. Self-draining, they
