ATTRACTIVE DECK PANELS COMPLEMENT SURROUNDINGS

Beautiful docks don't have to be high maintenance. Creating breathtaking shorescapes, modern TrueDeck Sunwalk™ Panels from True Harbor require no upkeep and have a superior limited 12-year warranty.

The unique TrueDeck Sunwalk Panels are impervious to saltwater, insects, chemicals and marine borers. Manufactured from UV-resistant engineering resin, the innovative panels will not support mold or mildew growth and can handle extreme heat, cold and exposure to the sun.

Available in Sarasota Sand and Cape Cod Gray, low-profile TrueDeck Sunwalk Panels feature a balanced, 4-way design. The aesthetically-pleasing, slip-resistant pattern makes T- and L-shaped docks appear continuous. Recessed top fastening provides a streamlined appearance.

Self-draining, eco-friendly TrueDeck Sunwalk Panels enable water, wind and debris to pass through. The unique openings also permit 42% light transmission to meet environmentally-sensitive installations over sea grass, allowing underwater plant growth and fish habitats.

Unlike conventional decking products, TrueDeck Sunwalk Panels from True Harbor come in larger, 3' x 4', 4' x 4' and 5' x 4' sizes for easy installation in about 1/4 of the time. Weighing just 1-1/4 lbs. per sq. ft., the stunning panels have a suggested retail price of about \$6 a sq. ft.
