REVOLUTIONARY DECK PANELS PROVIDE THE TIMELESS LOOK
OF WOOD WITHOUT THE HASSLE

Traditional lumber docks require labor-intensive installations and constant maintenance. The attractive TrueDeck Woodbeam™ Panels from True Harbor offer all the advantages of light-weight, polymer panels with the beautiful appearance of wood planks.

Constructed from advanced, reinforced engineering resin, the durable TrueDeck Woodbeam Panels are 70% lighter and install in 1/4 the time of heavy composite lumber decking. The state-of-the-art, UV-resistant material resists fading and degradation. Impervious to water, mold, mildew, rot and marine borers, it also features a unique, anti-static additive.

Creating stunning board-style docks, the TrueDeck Woodbeam Panels have an innovative, patent-pending reverse wood grain surface for superior slip resistance. Available in Quiet Gray and Dockside Cedar, the incredibly realistic panels are 2' x 4' and come in 1" and 1.5" thicknesses, requiring 16" and 24" on-center supports respectively.

With an unmatched 12-year limited warranty and the lowest installed cost in the industry, the aesthetically-pleasing TrueDeck Woodbeam Panels from True Harbor have suggested retail prices starting around \$6 a sq. ft.
