VESCONITE ADDS NETHERLANDS OFFICE AND GLOBAL PERSONNEL

Vesconite, the leader in high-performance bearing polymers, has opened a European office and warehouse in Utrecht, Netherlands. Additionally, it staffed that location and added a sales engineer to its Cleveland, South Africa headquarters. Dr. Jean-Patrick Leger, company CEO, made the announcement.

Matthew Davey is managing director of the Utrecht facility, located midway between Rotterdam and Amsterdam. A civil engineer with extensive experience in pumping and environmental technologies, he is a past Rhodes Scholar. Davey will develop and service Vesconite's European customer base, and speaks English and Spanish.

Thomas Utermark joins Vesconite as a sales engineer. With a structural engineering background, he has working marine experience. Multilingual, Utermark will focus on the marine industry, business development and improving the company's global sales processes.

Vesconite, the company's namesake polymer, and Vesconite Hilube are internally-lubricated thermoplastics that machine to +/-0.001". They have high load strengths and dimensional stability, do not swell and exhibit minimal stick-slip, and deliver a wear life up to 10 times that of bronze.
